

ELPAC Student Needs Matching Tool

This document helps educators and individualized education program teams choose the accessibility resources for students to use in the classroom and on the English Language Proficiency Assessments for California (ELPAC). The California Assessment Accessibility Resources Matrix (Matrix) includes additional universal supports available to students that may address some of the student needs identified here, however this document lists only the designated supports and accommodations available for the ELPAC. For more information, visit the [CAASPP & ELPAC Individual Student Assessment Accessibility Profile \(ISAAP\) Tool website](#).

The listed resources may be used across the ELPAC system unless noted in parentheses, then the resource listed may be used during specific ELPAC administrations.
